## PROFILE

---

Self-driven Full-Stack Developer currently studying Computer Science at Victoria University, Kampala. I build complete, production-ready web applications — from architecture to deployment. My flagship product, Acadex, is a live school management system serving real institutions. RestaurantOS is a restaurant system designed to bring order to all major processes in a restaurant. I write clean TypeScript/Python, think in systems, and ship things that matter.

## EDUCATION

---

### Bachelor of Science in Computer Science

Victoria University, Kampala · Year 2 (In Progress)

### Self-Taught / Independent Study

Full-Stack Web Development, DevOps fundamentals, system design, AI-assisted development workflows.

## TECHNICAL SKILLS

---

**FRONTEND** Next.js · React · TypeScript · Tailwind CSS · Framer Motion · GSAP

**BACKEND** Node.js · Express · REST APIs · NextAuth.js · Python

**DATABASE** MongoDB · Prisma

**TOOLS** Git · GitHub · Vercel · PNPM · VS Code · GitHub Copilot

**CURRENTLY LEARNING** PostgreSQL · Docker · tRPC · AI integration patterns

## PROJECTS

---

### Acadex [acadex-ed.vercel.app](https://acadex-ed.vercel.app)

Flagship Product · Live

A full school management system handling student records, grades, attendance tracking, and fee management. Built for real institutions — not a demo. Deployed on Vercel and actively used.

**Stack:** Next.js · TypeScript · Tailwind CSS · MongoDB · Vercel

### RestaurantOS [restaurant-os-ug.vercel.app](https://restaurant-os-ug.vercel.app)

Personal Project · Live

A restaurant management system for orders, checkout, kitchen display, purchases, inventory, receipts, reports, staff roles, and branch-level operations.

**Stack:** Next.js · TypeScript · Prisma · PostgreSQL · Framer Motion

## Digital Drift Blog [GitHub](#)

*Personal Project*

A modern blog platform with rich content management, user authentication, and a clean reader experience. Built with the latest versions of Next.js and React.

**Stack:** Next.js 16 · React 19 · TypeScript · TailwindCSS 4 · MongoDB · NextAuth.js

## WhatsApp Scheduler Bot [GitHub](#)

*Personal Project*

A Node.js automation bot that sends scheduled WhatsApp messages — reminders, notifications, and alerts — without manual intervention.

**Stack:** Node.js · whatsapp-web.js · JavaScript

## Secure Password Generator [GitHub](#)

*Personal Project*

A command-line Python tool that generates cryptographically secure passwords and passphrases with entropy scoring, strength analysis, and pattern avoidance.

**Stack:** Python · Cryptography · CLI
